Subject: R10 EJ PFAS Assessment Project

---

Hi All,

I am working with Kira for the R10 EJ PFAS assessment project. I believe this was an effort Harry started last year. The goal of this project is to better understand communities in R10 that have offsite PFAS impacts from DOD facilities. The contractor will do this by conducting community interviews and EJ screening. The project has capacity to assess six sites. Then from these sites R10 can develop best practices for all site. The following sites were suggested for potential:

1. Joint Base Elmendorf-Richardson (JBER), in Anchorage, Alaska
2. Fairchild Air Force Base, in Spokane, Washington
3. Whidbey Island Naval Air Station (including the Outlying Landing Field) in Whidbey Island, Washington
4. Puget Sound Naval Shipyard in Bremerton, Washington
5. Mountain Home Air Force Base in Mountain Home, Idaho
6. Joint Base Lewis McChord (JBLM) in Tillicum, Washington
7. Eielson Air Force Base, Fairbanks, Alaska

I believe your sites were suggested for this project because they have offsite PFAS? For starters, I would like to confirm some basic things (such as offsite PFAS) about the sites and then those that do meet the criteria can move forward. I made a simple spreadsheet with a few yes/no questions and will send a sharepoint link. Would you fill in the spreadsheet questions for your site? Once the sites are selected then the contractor will work with the RPMs for the community survey and EJ screening.

Thank you,

Erin Gleason
